/1 The first set of four (orange) columns shows the number of individual leases for which the company has a share of ownership, no matter how small that share may be. The second set of four (yellow) columns adjusts for the company's ownership share, showing the number of leases the company actually holds. For example, say a hypothetical company, XYZ Production Company, holds 100% of lease A and 50% of lease B. In the first set of columns, XYZ would have a "2" in the total column as that reflects the number of leases in which it holds an interest. In the total column for the second set, XYZ would show 1.5 leases, which reflects its actual ownership share ($1 \times 1 + 0.5 \times 1 = 1.5$).

/2 Several companies listed in the table are affiliated with each other. For example, "Shell Gulf of Mexico Inc." and "Shell Offshore Inc." are both part of the Shell group of energy companies. While there are 59 companies listed on the table, when such affiliations are considered, there are 49 companies with which MMS would potentially negotiate.

Explanatory Notes for the Table
“Companies Holding Leases From 1998/1999 Lease Sales”

1. A company's holdings are displayed in two ways in the table. The first set of four (orange) columns shows the number of individual leases for which the company has a share of ownership, no matter how small that share may be. The second set of four (yellow) columns adjusts for the company's ownership share, showing the number of leases the company actually holds. For example, say a hypothetical company, XYZ Production Company, holds 100% of lease A and 50% of lease B. In the first set of columns, XYZ would have a “2” in the total column as that reflects the number of leases in which it holds an interest. In the total column for the second set, XYZ would show 1.5 leases, which reflects its ownership share ($1*1 + 0.5*1 = 1.5$).
2. The data is displayed in three categories – leases which are producing or have produced; leases that are part of an announced oil or gas discovery; and all other existing leases that don't fit into the other two categories.
3. Several companies listed in the table are affiliated with each other. For example, “Shell Gulf of Mexico Inc.” and “Shell Offshore Inc.” are both part of the Shell group of energy companies. While there are 59 companies listed on the table, when such affiliations are considered, there are 49 companies with which MMS would potentially negotiate.
4. The data is current as of September 18, 2006. However, companies assign, sell, or exchange rights on a regular basis, leases may be relinquished at any time, and new discoveries could be announced, so the data presented in the table will change over time.

**Companies which have responded to MMS invitation to negotiate revisions to
the 1998/1999 deep water leases**

Companies that have met with MMS

NOTE: This includes only those companies that have given us permission to identify them as having met with MMS. We will update this list as more companies provide permission.

BP
Chevron
Devon
Dominion
ExxonMobil
Shell
Walter Oil & Gas

Companies that have responded by letter

Anadarko
Apache
BP
Devon
El Paso
Hess
Marathon
Marubeni
Murphy
Noble
Petrobras
Pioneer
Shell
Total
Woodside
